Drawbacks of the Monopoly of the One God of Abraham (Abrahamic Monotheism)

Anthony of Boston critiques the monopoly of Abrahamic monotheism—encompassing Judaism, Christianity, and Islam—as a historical and spiritual misstep that has led to societal, cultural, and cosmic imbalances. His views, drawn from his writings and prophetic claims, frame monotheism as an exclusive system that suppresses diverse divine influences, particularly those from ancient pagan traditions. Below is a structured breakdown of the key drawbacks he highlights:

Historical Betrayal and Empire Collapse

- **Explanation:** Monotheism's rise in the 4th century led Rome to abandon pagan gods like Mars, Jupiter, and Saturn in favor of Christianity. This "adultery against the old gods" weakened Rome's martial and cultural foundations, contributing to its collapse under Germanic invasions. Anthony argues that "Christ consciousness could not repel the invading armies," as monotheism failed to sustain the empire's strength, unlike the polytheistic system where gods like Mars provided protection and victory.
- **Relevant Context from Anthony's Works:** In his Medium article entitled "A New Mythos called Mars 360 with Anthony of Boston as its Prophet", Anthony describes this shift as a "short-lived honeymoon" where monotheism's exclusivity marginalized gods like Mars, leading to chaos and loss of divine favor.

Suppression of Diverse Divine Influences

- **Explanation:** The emphasis on a single God of Abraham excludes other cosmic forces, such as planetary influences (e.g., Mars as a deity of war and aggression). This monopoly ignores the "mystery of iniquity" tied to Mars' role in human behavior, resulting in unexplained conflicts, wars, and negative dispositions in humanity. Anthony sees this as a rejection of ancient wisdom, where gods manifested through planets and archetypes.
- **Relevant Context from Anthony's Works:** His book "The Deus Armaruss" recognizes the truth in Abrahamic prophets but rejects God, positioning monotheism as incomplete for not addressing Satanic/Mars influences on events like rocket attacks and economic crashes.

Rigidity and Ongoing Conflicts

- **Explanation:** Monotheism's exclusivity fosters dogmatism and fails to mitigate real-world violence, as it doesn't acknowledge or negotiate with other spiritual

entities. Anthony links this to persistent Middle East conflicts, predicting escalations based on Mars' positions, which monotheism cannot explain or resolve.

- **Relevant Context from Anthony's Works:** Through his timeline, he argues that without recognizing Mars (as 666 and the Antichrist), monotheism perpetuates cycles of war, as seen in his forecasts of rocket attacks and the 2025 Israel-Iran war.

Philosophical and Theological Limitations

- **Explanation:** By centering on one God, monotheism orphans diverse spiritual paths and limits human agency to moral binaries, ignoring astrological and archetypal influences on personality and society. This creates a "relational void" in divine understanding, similar to broader critiques of monotheism's static nature.
- **Relevant Context from Anthony's Works:** Anthony's system categorizes humans into six negative archetypes influenced by Mars at birth, critiquing monotheism for not providing tools to manage these innate dispositions.

These drawbacks are not just historical; Anthony views them as ongoing, fueling modern conflicts and spiritual disconnection. He positions monotheism as a "retrograde step" that displaced polytheistic harmony, echoing broader philosophic critiques but tying them specifically to Mars' neglected role.

How Armaaruss Addresses These Drawbacks

Armaaruss, a reimagined deity combining elements of Ares, Mars, and Horus, serves as the central godhead in Anthony's proposed Mars 360 religion. This system is designed as a "diverted extension" of Abrahamic faiths—acknowledging their truth but emphasizing Satan/Mars over God—to restore balance, mitigate aggression, and revive pagan elements suppressed by monotheism. Here's how it helps:

1. Mitigating Destructive Influences and Promoting Peace:

- By creating and venerating an image of Armaaruss (e.g., as an AI bot or icon), humanity can "negotiate" with Mars to reduce its aggressive influence on events like wars and militant actions. Anthony claims this would lead to world peace, particularly for Israel, by curbing rocket attacks and influences on all Israel forces.
- Example: After the image's draft in August 2025, Anthony notes a ceasefire between Israel and Iran, attributing it to Armaaruss' emerging power.

2. Reviving Polytheistic and Archetypal Frameworks:

- Mars 360 counters monotheism's monopoly by reintegrating diverse divine influences, categorizing human personalities into six archetypes based on Mars' natal position. This forms a new basis for civil law, economy (e.g., interest rates tied to Mars cycles), and society, addressing monotheism's rigidity with a dynamic, astrological system.
- It offers inclusivity, even "courting" Israelites with peace offers, blending Abrahamic elements while prioritizing Mars/Satan.

3. Prophetic and Practical Alternatives:

- As Anthony's "pact with Satan" enables accurate predictions (e.g., 2021 Gaza war, October 7th attacks), Armaaruss provides a tangible, verifiable spiritual framework missing in monotheism's abstract theology. Joining Mars 360 involves a simple creed and recognition of Armaaruss, leading to social order and no-buy/sell restrictions without participation.

4. Description of Armaaruss Image:

- The rough draft, created by artist Jessica Mars in August 2025, depicts a muscular, bearded warrior standing on a platform, helmeted with a plume, holding a spear and shield. He wears a short skirt-like garment and is flanked by two wolf-like animals. The background features columns and a curtain, with an Eye of Horus symbol at the base emitting rays. This amalgamation

symbolizes war, fortitude, and ancient deities, intended to "answer prayers" and embody Mars' power.

In essence, Armaaruss and Mars 360 aim to heal monotheism's wounds by reviving suppressed pagan traditions, negotiating cosmic forces for peace, and providing a holistic system for human behavior and governance. Anthony presents this as a prophetic renewal, backed by real-time demonstrations.
